

Important Note: For the given requirements, remove **DUPLICATE** records wherever applicable.

- A. Display **firstname**, **lastname** and **city** of those teacher(s) who are available in 'Pune' or 'Mysore'. Perform **case sensitive** search. For the given sample data, following is the expected output.

FIRSTNAME	LASTNAME	CITY
Jecy	Mac	Pune
Klem	David	Mysore

Note: Type the solution in *dbms_solA.sql* file.

[2 marks]

- B. Display **subjectid** and **firstname** of the teacher(s) who are in charge of the subject and whose salary is greater than 5000. For the given sample data, following record will feature as part of the output along with other record(s).

SUBJECTID	FIRSTNAME
S401	James

Note: Type the solution in *dbms_solB.sql* file.

[2 marks]

- C. Display **subjectname** and **noofdays** of those subject(s) which have noofdays same or more than the *average* noofdays of all the subjects. For the given sample data, following record will feature as part of the output along with other record(s).

SUBJECTNAME	NOOFDAYS
JEE	12

Note: Type the solution in *dbms_solC.sql* file.

[2 marks]

- D. Display **teacherid** and **city** of those teacher(s) who belong to the same city and whose firstname contains 'A' or 'E' anywhere. Perform **case insensitive** search. For the given sample data, following records will feature as part of the output along with other record(s).

TEACHERID **CITY**

- E. Identify teacher(s) who have been allocated a subject to deliver in 'VCR' mode and is in charge of any subject. Display the numeric part of allocationid as "ALLOCATION" (column alias), lastname and subjectname of the subject allocated for the identified teacher(s).
For the given sample data, following is the expected output.

ALLOCATION	LASTNAME	SUBJECTNAME
561	Ronald	JEE

[3 marks]

Note: Type the solution in *dbms_solE.sql* file.

- F. Identify the teacher(s) who are allocated with any subject(s) for the highest total noofdays with credit 4. Display teacherid and total noofdays as "DAYS" (column alias) for the identified teacher(s).
For the given sample data, following is the expected output.

TEACHERID	DAYS
T300	24

[3 marks]

Note: Type the solution in *dbms_solF.sql* file

- G. Display firstname, subjectname as "SUBJECT" (column alias) and bonus as "BONUS" (column alias) for all the teachers. Display 'NS' for SUBJECT and 'NB' for BONUS if the teacher is not allocated with any subject or receiving bonus less than 700.
For the given sample data, following records will feature as part of the output along with other record(s).

FIRSTNAME	SUBJECT	BONUS
Nancy	SAP	800
Alex	NS	NB

[3 marks]

Note: Type the solution in *dbms_solG.sql* file

- H. A query for a particular requirement is written using JOINS.

```
SELECT a.teacherid, a.subjectid, a.deliverymode
FROM allocation a JOIN allocation aa ON aa.teacherid=a.teacherid
WHERE aa.subjectid=a.subjectid AND aa.deliverymode<>a.deliverymode;
```

- G. Display **firstname**, subjectname as "SUBJECT" (column alias) and bonus as "BONUS" (column alias) for all the teachers. Display 'NS' for SUBJECT and 'NB' for BONUS if teacher is not allocated with any subject or receiving bonus less than 700.

For the given sample data, following records will feature as part of the output along with other record(s).

FIRSTNAME	SUBJECT	BONUS
Nancy	SAP	800
Alex	NS	NB

[3 marks]

Note: Type the solution in *dbms_solG.sql* file

- H. A query for a particular requirement is written using JOINS.

```
SELECT a.teacherid, a.subjectid, a.deliverymode  
FROM allocation a JOIN allocation aa ON aa.teacherid=a.teacherid  
WHERE aa.subjectid=a.subjectid AND aa.deliverymode<>a.deliverymode;
```

For the given sample data, following record will feature as part of the output along with other record(s).

TEACHERID	SUBJECTID	DELIVERYMODE
T300	S400	CLR

Rewrite the query using *Correlated Subquery* only.

Note: Type the solution in *dbms_solH.sql* file.
